1. This communication is in response to applicant's amendment received on April 26, 2005.

2. The proposed drawing correction, filed on April 26, 2005, has been approved by the examiner.

3. Newly submitted claim 31 directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: Claim 31 contains software programs for analyzing and interpreting the noise signals (note, such software programs are not mentioned in the specification).

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claim 31 is withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

4. The disclosure is objected to because of the following informalities: It is vague from the specification as to how corresponding locations of stress in the pipeline wall are determined.

Appropriate correction is required.

5. Claims 1,14 and 27 are objected to because of the following informalities:
In claims 1,14,27, it is unclear as to how corresponding locations of stress in the pipeline wall are determined.

Appropriate correction is required.

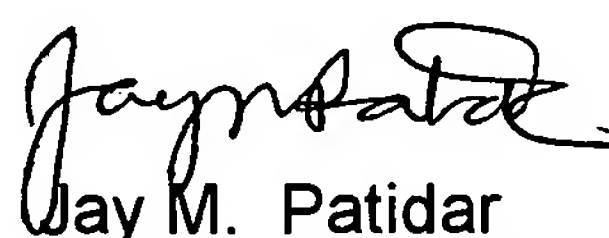

6. Claims 1-30 are allowed.

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Note PTO-892.
